Junior Board of Trade Invites the Seniors

The Junior Board of Trade is calling a special meeting for Tuesday, June 13th at 8:30 p.m. in the Legion Hall, and are inviting all the members of the old Board of Trade and others interested to meet with them.

The object of the meeting is to try and get the Senior Board of Trade to reorganize or to devise some scheme whereby the senior men can be affiliated with the Junior Board. The juniors feel that they can accomplish much more if they can obtain the co-operation of the senior men. Both business and professional men and farmers are invited to attend the meeting. Lunch will be served at the close.

N. S. Clarke, George Burns and J. A. McElhee are a committee to see that the senior men attend, and Ed. Ford, Carlton Leeson and Kenneth Burns are appointed to see that the junior members turn out.

Will Display Shop and Home Economics

The work of the Home Economics and General Shop Classes of the Didsbury Schools will be displayed in the Home Economics Room at the Public School this Friday, June 9th, from 1:30 to 4:30 p.m.

Tea will be served from 3:30 p.m. Everyone welcome.

Many Horses Entered For Race Meet

Soft Ball Tournament Commences at 12:30

From all indications there will be full entries in all the events at the Didsbury Races which will be held on Wednesday next.

A number of outside horses to be entered are already here and entries have been received from McAttee of Calgary; Gillrie of Morrin; Semple of Aldrie and Hodgins of Bowden. Forsyth of Camrose and Cooley of Stettler are also expected to have horses entered. In addition to these five or six local harness horses are expected to be on hand. A number of owners of running horses also indicated that they will have horses there.

In addition to the races there will be a softball tournament with prizes of \$20.00 for 1st place and \$10.00 for 2nd place.

A softball tournament will be held in the mid-field with first game commencing at 12:30 p.m. According to the tournament secretary ten or twelve teams will be entered. It will be a big day for softball fans.

The VanDusen midway will be in operation both afternoon and evening and there will be a jitney dance at night.

Gun Shoot Results.

Scores in the gun shoot held last Thursday night were as follows:

Leo Weige	22 out of 25
Jim Chamberlain	21 "
Bill Ranton	20 "
Irwin Klein	19 "
Ken McCoy	17 "
Ed. Watkin	17 "
Russell Ady	14 "
Geo. Hardy	10 "

Next shoot: Thursday, June 15th

NOTICE OF POLL.

Hospital By-law No. 376 FOR TOWN OF DIDSBURY

Public Notice is hereby given that a Poll will be held for the purpose of taking the votes of the Proprietary Electors of the Town of Didsbury on By-law No. 376, being a by-law to authorize the Mayor and Secretary-Treasurer to execute on behalf of the said Town of Didsbury an Agreement, the terms of which have been published, between the said Town and the Municipal District of Mountain View No. 310 and Municipal District of Westerdale No. 311, in connection with the erection, completion and equipment of a Community Hospital, to be known as "The Didsbury and District General Hospital," and that the Polling will take place on Monday the 12th day of June, 1939, from ten o'clock in the forenoon until seven o'clock in the afternoon at the following place, namely: the Office of the Secretary-Treasurer of the Town of Didsbury, and that I will at the said office, on the said 12th day of June, 1939, at 7 o'clock in the afternoon, sum up the votes and declare the result of the poll.

Given under my hand at Didsbury, Alberta, this 27th day of May, 1939.

W. A. AUSTIN,
Returning Officer.

Local Postmaster Receives Presentation

In recognition of the services he has rendered the Association, Mr. H. Morgan, our local postmaster was presented with a beautiful silver tea service at the convention of the Alberta Postmasters' Association which was held at the McDonald Hotel at Edmonton last week.

For eleven years Mr. Morgan was president of the Alberta Association and for two terms he was president of the Dominion Association. He was elected a member of the executive at the convention this year.

Good Rains Bring Benefit to Crops.

A rainfall of 2.75 inches fell over the Didsbury district since last Saturday according to the Midland Pacific rain gauge.

The rain has been general all over Alberta and with the wheat and most of the coarse grains above the ground and showing healthy growth, the prospects of crops throughout the province at this period is better than for years.

"Good rains in June mean a good crop," has proved true in other years and prairie farmers are hoping this saying will justify itself this year.

Obituary.

JAMES EUBANK

James Eubank, prominent farmer and cattleman of the Didsbury district, passed away on Friday, June 2nd, at Edmonton, where he had been taking medical treatment.

Born at Hagersville, Ontario, in 1869, Mr. Eubank came west with his family in 1905 and settled on land about 4 miles east of town. For a short period he was in the implement business in the building now occupied by Adshead's Garage.

Later he acquired the farm 1 1/2 miles northeast of town, where he engaged in cattle feeding and farming for about 20 years. He was one of the largest cattle feeders in the district and was widely known both here and in Calgary and Edmonton cattle circles.

With the exception of a few years when he lived in Edmonton, he lived on the farm up to the time of his death.

He is survived by his widow; two sons, Robert at home and John at Edmonton; three daughters, Mrs. Merle O'Brien, of Ponoka, Mrs. Ann Macdonald and Mrs. Katherine Horne, of Edmonton. Also six grandchildren.

The funeral services were held at the Andrews Funeral Home, Edmonton, on Monday afternoon, Rev. Mr. Kenwood officiating. Interment took place at Beechmount Cemetery.

You'll get the best values in men's work clothes and work shoes—at T. E. Scott's!

Vote on Hospital By-Law, Monday

The proprietary electors of the Town will vote on the Hospital By-law on Monday next. The passing of this by-law will authorize the Town to enter into an agreement with the Municipalities of Mountain View and Westerdale to erect and equip a new hospital at Didsbury.

A by-law authorizing the Town to raise \$30,000.00 to finance the project was passed last fall, and when the by-law for the agreement is passed, steps will be taken to raise the finances and commence building operations.

Two representatives will be chosen by each of the municipalities and the town, to form a board of six members who will select a site and approve of plans for the erection of the hospital building.

On the same date Olds will hold an election to authorize their agreement with the municipalities.

Every proprietary elector should come to the poll and vote for this by-law. The present hospital has served its purpose and it has been clearly demonstrated during the past year that a modern hospital with more accommodation and up-to-date equipment is badly needed in the district.

If you have a vote—be sure and exercise it in favor of this by-law. It takes a two-thirds majority vote to carry the by-law.

W. Wrigglesworth Elected Councillor

William Wrigglesworth was the only candidate nominated at the by-election held on Monday to fill the vacancy caused by the resignation of Councillor Fred Budgeon. He was declared elected by acclamation and was sworn into office at the council meeting held the same evening.

Knox United Anniversary Day

Next Sunday will be Anniversary Day and a cordial invitation is given to all friends to observe this occasion by attending Divine Worship at 7:30 p.m. There will be music by the Junior Choir and the guest preacher will be the Rev. George D. Young, B.A., B.D., of Ponoka.

The Anniversary supper will be held on Monday next at 6:15 p.m. and will be followed in the evening by a short concert program including an address by the Rev. G. D. Young.

Mr. Young will also be in Westerdale in the afternoon but is unable to be at Westcott in the morning. The minister will preach on the topic, "The Marks of a Christian." A cordial welcome is extended to all our country friends.

Stores Close 12 Noon on Race Meet Day.

To allow the business men and clerks to take in the full afternoon at the races next Wednesday, the stores will close at 12 o'clock noon instead of 1 o'clock.

University Objectives

Quality rather than quantity should be the objective of the universities of the country.

At all times it is of greater importance to the nation that a few brilliant students capable of exercising leadership be graduated from the institutions of higher learning than a large number with mediocre attainments and of average capacity.

It is of still greater importance in times of national and international stress, like the present, when unemployment threatens the foundations of democracy from within and when freedom and liberty are endangered by external forces.

Under such conditions the quality of leadership cannot be too high and it is not too much to expect that the universities and the product of the universities be capable of giving the guidance which the people of the country expect in their efforts to solve these pressing problems.

It is an oft heard complaint that governments in the democratic countries are not effectively tackling the major problems but are content to reflect the ever changing confusion of mass opinion with an eye on the target of political expedience, instead of mapping out a definite program with a definite objective, based on historically tested principles, and adhering to it.

If such an indictment is well founded the importance of the work ahead of the universities in turning out students who will be capable of giving sound leadership and of attacking problems as they arise with wisdom and clear perspective, plus the character and grit necessary to prevent defection from the direct path to the goal by every breeze that blows, can hardly be exaggerated.

The Main Objective

When it is remembered that the universities draw on the public purse for considerable sums annually for partial subsistence, the people have a right to expect much of these institutions. They have a right to expect these institutions to select the raw materials with the utmost care to ensure a high quality finished product. They have a right to expect to ensure a high quality finished product. They have a right to expect the curriculum to be geared up to the level of such an objective. They have a right to demand that the teaching staff be selected with high ideals in view.

It is true that in recent years some steps have been taken by the Western universities to meet the demand for quality in the student body. This has been done by stiffening, to some extent, educational requirements as entry qualifications and by imposing additional restrictions governing the process of weeding out the unfit and the unprofitable during tenure.

It is also true that economic conditions during the past few years have contributed to the process of reducing the number of students passing through and graduating from Western universities, but this factor, of itself, has not necessarily been responsible for advancing the quality of the student body at the expense of quantity.

Since fewer can find the necessary means to send their progeny to the universities during periods of financial stress, the trend might be expected to be in the other direction on that very account. It leaves the doors of the universities open only to a smaller number whose parents can afford to send them. In some cases a percentage go because it is the "smart thing to do," because a parchment is expected to yield dividends in social advantages or simply because a university education is expected to pave the way for contacts which may be useful subsequently in business.

When times are prosperous it is difficult for the offspring of the comparatively poor to secure a university education, no matter how high may be their attainments, no matter how well equipped mentally they may be to make the most of the opportunities afforded. When times are hard, the difficulties in the way of educational advancement for such students are multiplied ten fold or their opportunities are entirely obliterated, except for the very small number for whom scholarships are available. Thus, the country loses potential services which might have been of inestimable value.

Based On Scholarship

Taking a long range view of the problems of the universities, of the need of the country for a body of young men and women in training for future leadership and other related factors, it would appear to be a paying proposition to make wider provision for a greater number of scholarships tenable at the universities from public funds provided sufficient funds are not available from private sources.

Coupled with the provision of more public scholarships a further tightening of entrance requirements might well be made as well as the imposition of higher progressive qualifications during the period of studentship.

The whole objective of such changes as might be made would be, of course, to make university education available to an increasing percentage of those who could reap the greatest benefit therefrom, not only for themselves but for the country at large, and to a declining proportion of those who would make use of such advantages for other and less worthy purposes.

Would Need Too Many

Medical research workers have discovered that cabbages have an antiskink action much as calves' liver has antianemia properties. The only trouble is that the average diabetic would have to eat about 20 to 25 cabbages a day.

Iceland shipped products valued at \$12,000,000 to the U.S. in 1938.

Known To Indians

When Jacques Cartier's crew landed in Labrador in 1535, they were suffering from scurvy, which Indians treated with a decoction of spruce needles—a good source of vitamin C, though no one knew about vitamins then.

Blinding headlights are the worst death rays.

An Honest Man

Justice Is Handed Out To Man Who Impressed The Court

Mr. James Dunbar, of Huron County, is a poor man and with a minimum of education. Yet he is possessed of an advantage that money cannot buy nor education acquire. He is honest.

This characteristic stood Mr. Dunbar in good stead in a Goderich court when he attempted to break his uncle's will. The story briefly is that, in 1913, the uncle made a will bequeathing his farm to another nephew. Then 23 years ago, Mr. Dunbar went to live with his uncle on the promise that the farm would come to him. He took with him his life's savings, \$1,200, worked without pay since then, and spent his savings. The uncle evidently intended to make over the will, but failed to do so.

Breaking a will is no easy thing to do. But Mr. Dunbar did it. How? By convincing Mr. Justice Godfrey of his absolute honesty; that the uncle had intended changing the will. Furthermore, he had 21 neighbors to testify to his honesty.

Mr. Justice Godfrey said he had never been more impressed by any man than by this 67-year-old weather-beaten farmer, dressed in a 31-year-old suit, and without money or education. It is a high tribute.—Windsor Star.

ARMS USELESS ON A WET DAY

Rheumatic Pains Relieved By Kruschen

Here is a noteworthy instance of the manner in which damp weather can affect the joints of one who is subject to rheumatic pains.

"I had been suffering from rheumatism very badly," a man writes, "and had such pains in my joints that I could hardly bear it, on a wet day especially. It pained me terribly to use my arms, and I was hardly able to work. I tried two different remedies, but I was still as bad after the treatment.

"Then I was told to try Kruschen Salts, which quickly brought relief. So of course I have kept on with it, and I am now much better and have never felt so fit for years. I used to feel so miserable and sluggish, but now it is a pleasure to be able to work."—S.B.

The pains and stiffness of rheumatism are often caused by uric acid crystals in the muscles and joints. The numerous salts in Kruschen assist in stimulating the internal organs to healthy, regular activity, and help them to eliminate excess uric acid.

Few markets are as unusual as the onion market of Berne, Switzerland. It is held once a year on a Monday in the second half of November, and dates back to the Middle Ages.

It All Depends

Woman Juror Had Open Mind On Capital Punishment

The Judge was about to hear an action in the High Court when a woman juror rose and requested exemption from service on a plea that she was a non-believer in capital punishment.

"But this is a civil action," the Judge explained, "and has nothing whatever to do with capital punishment. It is brought by a woman who gave her husband two hundred pounds to buy her a fur coat. The husband, instead of buying the coat, lost the money gambling, and now his wife is suing him for the return of her two hundred pounds."

"Oh, indeed, is that it?" replied the juror relieved. "Then I've no objection to serving." She pondered a moment and then added thoughtfully: "And, perhaps, after all, I was wrong about capital punishment."—Edinburgh Scotsman.

SELECTED RECIPES

SHREDDED WHEAT STUFFING

6 crushed Shredded Wheat Biscuits
2 tablespoons minced parsley
1/2 cup butter
1/2 cup finely diced celery
1 to 4 tablespoons diced onion
1 cup oysters or sliced mushrooms (may be omitted)
1 cup cooked and drained rice (wild rice is excellent)
1 teaspoon to 1 tablespoon poultry seasoning
1/2 cup stock from cooked giblets (chopped giblets may be included)
Salt and pepper to taste.

Place the crushed Shredded Wheat Biscuits and the parsley in a mixing bowl. Heat the butter to bubbling in a frying pan, add the diced celery and onion, and cook gently until the onion is soft and yellow. If mushrooms are included, they may also be sautéed in the butter mixture. Stir the rice into the sautéed onion and celery mixture, then add to the Shredded Wheat. Add the oysters (if included), poultry seasoning, and stock from the giblets. Season to taste with salt and pepper, and mix thoroughly. Stuff the bird or joint and proceed with the roasting.

CHEESE DROP BISCUITS

2 cups sifted flour
2 teaspoons Calumet Baking Powder
1/2 teaspoon salt
4 tablespoons butter or other shortening
1 cup grated Canadian cheese
1 cup milk (about)
Sift flour once, measure, add baking powder and salt, and sift again. Cut in shortening and cheese. Add milk gradually, stirring until soft dough is formed. Drop from teaspoon on ungreased baking sheet. Bake in hot oven (450 degrees F.) 12 to 15 minutes. Makes 18 biscuits.

An onserver has reported watching a mother eagle teaching a young bird to fly by repeatedly dropping it and then swooping down to catch it on her back.

Non-Magnetic Ship

Was Launched Recently And Will Be Used By Scientists

A ship with no iron or steel in her was launched recently in the River Dart at Dartmouth, Eng.

She is the non-magnetic exploring ship Research, which will spend her life roaming the ocean so that scientists may study the mystery of electricity, its currents and its storms.

She is metal-less because of the delicate instruments on board. She will carry no tinned foods, and all preserved meats will be salted down in casks as in Nelson's day.

Great Ingenuity Displayed By Refugees In Transferring Money From Nazi Countries

Money and jewel smuggling has become one of the most popular "sports" in Europe. The motive lies in the multitude of "closed economies" and interdictions to take money or valuables from one country to another, which is one of the characteristics of the continent in 1939.

This is only one of the serious angles of the well-known refugee problem. If one dares to have an independent thought, it becomes almost impossible to live at home in Europe. One finds the Ruthenians in Rumania, the Rumanians in Bulgaria, the Bulgarians in Yugoslavia, the Yugoslavs in Hungary, the Hungarians in Slovakia, and the Germans and Jews all over the place—and many of them without money.

Necessity has sharpened the wits—and how to outwit frontier officials and vigilant police officers on the lookout for illegal transmission of money has become a science. So desperate is the case of many a would-be refugee in Germany or Italy that on the slightest acquaintance they will plead with the Canadian or American tourist to try and smuggle out a little money or a few jewels for them.

Two Austrians solved the problem. They arrived at the Swiss frontier with a load of vegetables. The officials turned out the wagon and then, satisfied that nothing was concealed under the carrots and potatoes, allowed them to be reloaded again, and cross into the Swiss village. It turned out later that one carrot in each bunch had a long cylindrical hole cut in it into which had been dropped uncut precious stones, or bills of large denominations were rolled firmly and pushed into them and finally a small part of the carrot replaced and the vegetable well rubbed with earth.

The "snowball" method has worked famously not only in Central Europe but between Germany and Belgium and Germany and Alsace. Under the noses of the guards, snowball matches across the line permitted many a snowball in the middle of which money had been packed, to be thrown into France. "Catch this one" had a double meaning.

Money has been found in loaves of bread, in fruit, between sandwiches where the ham should be; tucked into beer bottles before reaching the frontier and afterwards taken out and dried in bicycle inner tubes; inside fountain pens, and even stuffed into the hollow tube railings which hold up the baggage carriers in the compartments of many a continental train. But a good deal more has escaped in the same manner to reach quite safely the poverty-stricken and anxious refugees—or to aid those who have only this little which they

have risked the concentration camp to save.

Hikers have brought money out of Germany and Italy in their haversacks or in the toes of dirty socks; false bottoms and handles of valises have and are being utilized; a bill of large denomination was brought safely from Vienna wrapped neatly in the coils of a woman's long hair.

A young man brought a small fortune from Munich for refugee friends in Paris. It was cleverly concealed in three enormous German sausages, four inches in diameter. He declared them virtuously at the frontier and paid a stiff duty.

Another collected prospectuses in Berlin, Frankfurt, Munich and Vienna; cut out the pictures and carefully pasted bills in their places, re-folded them and then scattered them carelessly through the valises of a tourist friend. When the bags were opened, the officer paid not the slightest attention to the folders which are to be found in the suitcases of thousands of tourists. More than 10,000 marks (\$1,025) were carried out in this way.

But the best story comes from Italy. M. Giordani Giordano, a Jewish banker in Milan, sent his family out of the country, transferred his property into foreign currency and then carried out an ingenious plan when menaced by the new racial laws. He wrote an anonymous letter to the police denouncing himself for having illegally sent 10,000,000 lire (\$525,000) out of the country, depositing them in a bank in Lugano, a small town in Switzerland near the Italian border.

The police came and accused the banker of criminal conduct while the victim feigned astonishment and protested his innocence vigorously. "Will you accompany me to Lugano, and examine with me, the bank accounts where you accuse me of having sent my fortune? Allow me to prove my innocence," he begged the police.

Finally the chief consented and sent him to Lugano flanked by two policemen. Arriving in Switzerland and examining the accounts, no such account was to be found in his name.

Furious, the police intended to return, taking their prisoner with them, when M. Giordano reminded them they were on Swiss territory and could do nothing but leave him there at liberty. And then to add further to their discomfiture, he walked over to the wicket and said: "Will you open an account for me please?" He took a wallet from his pocket and rapidly passed over his fortune which he had tranquilly carried across the border between two Italian policemen.

The Prestige Of Speed

Britain Speeds Up Plane Services On European Routes

"From now onward," says the London Times, "the fastest aircraft on three of the main European routes will be British." New machines and new schedules have cut five minutes off the time to Paris, 15 minutes off the time to Berlin and Frankfurt, 55 minutes from Budapest. Passengers may get little from these savings except the satisfaction of it, the Times observes, but speed in the air, as on the sea, has become "an instrument of national prestige" and, as such, an important consideration in air traffic.

Great Britain's plan for many years, in these matters, was "to strike a compromise between speed and pay-load, and to offer high comfort and safety in exchange for a few extra minutes on the way". But air travellers were not pleased. "While Britain was plodding along with aerial Pullman cars of moderate speed the passengers were drifting away to the smaller but faster liners of other nations."

A Government committee made an inquiry, and agreed that the speed of British passenger ships must be increased. The Government accepted the recommendation, raised the subsidies "and waived the dogma", says the Times, "that air transport must become self-supporting". Speed was the thing, and in less than a year after adopting its new policy Britain "has taken three of such blue ribbons as may be found in Europe." Prestige is restored—and passengers to Paris save five minutes.—Ottawa Journal.

Smallpox Treatment

Disfigurement Said Prevented By Use Of New Drug

Treatment of smallpox with sulfanilamide—so successfully that disfigurement was prevented in 3 of 4 cases—was reported in the Journal of the American Medical Association.

Dr. Walter O. McCammon of Springfield, Ky., author of the article, administered the new drug to four persons. All, he wrote, "recovered immediately after the subsidence of the fever and the symptoms of the initial phase. Three suffered only passing skin eruptions and these disappeared rapidly. The fourth had only three pox marks."

Three other patients were given orthodox symptomatic treatment at the same time, he added, and they developed the typical eruption. They were unable to return to work until about a week later than the four recipients of sulfanilamide—a drug derived from a dye that has proved of value in 19 different types of infection since it was introduced in 1935.

Whole or partial livelihood for 18,000,000 people is furnished by the silkworm in Japan.

Accident insurance policies for travellers are sold by a new coin-operated machine.

Special Practice Needed For Aviator To Land Plane On Deck Of An Aircraft Carrier

Rare Bits Of China

The Collecting Of Pottery Makes An Interesting Hobby

Pottery as a hobby does not necessitate the actual making of it. You will get a tremendous enjoyment out of collecting. A retired Australian banker, whom I met in London, is getting the greatest thrill out of life collecting rare bits of china. It is not the intrinsic value of your possessions, but the joy you experience in getting them together.

Zola the author was a collector of Delft. Alexander Pope considered the love of china collecting in women denoted an unusual strength of mind and an absence of nerves. Gladstone collected Leeds pottery, and could readily distinguish the genuine from other wares. So if you decide on collecting pottery or porcelain as a hobby, you will find yourself in excellent company.

Dr. Lu, one-time Chinese ambassador to Great Britain, retired to Macao, South China, and collected fine old Chinese porcelain. From his collection he gave a friend of mine a lovely bit of old porcelain. A similar piece of the same period—the Sung—we were told had brought £10,000 at a sale at Christie's in London in 1927.

You may concentrate on one particular type of English pottery, such as Staffordshire, Bow, Chelsea, Derby, Royal Worcester, Leeds, Coalport, Spode or Wedgwood; or you may acquire some rare bits of Ming, Dresden, Sevres or colorful Italian Majolica.

The safest way is to buy exquisite pieces of old porcelain from a reliable dealer, who is willing to stand back of his sale with a written guarantee. But such a method is scorned by the true collector; for, besides involving the payment of all a piece is worth, it lacks the sporting appeal of the quest! M. Ellen Douglass in "The Canadian Thinker".

A Real Optimist

Londoner Sees Europe Settled Down And Business Booming

What might be termed long-term optimism for industry and business was expressed by William Will, a former director of Allied Newspapers. He said: "When Europe has settled with the bombs and bombast that are at present so prevalent in certain quarters, and I consider that is within measurable distance, of achievement industry will advance rapidly, and there will be a period of prosperity such as the world has never seen."

England's Forestry Commission is the biggest landowner in that country, with 516,390 acres of land planted with trees.

It is one thing to be able to fly and to land an airplane on a grassy airfield, and it is quite another thing to land one on the deck of an aircraft-carrier. Pilots who are quite competent in the air and on the ground need special instruction and practice before they can land on a deck with confidence, and one of H.M. aircraft-carriers has to be told off for this training work. At present the task is being undertaken by the Courageous in the Firth of Forth and recently I was privileged to spend a few days in her to see how the work is done.

On my first day I saw a batch of pilots finishing off their training, each doing eight consecutive landings. The machine used was a Fairey Swordfish, known as a T.S.R. machine because it can carry a torpedo, spot for the guns, and be used for reconnaissance. It has a very sturdy undercarriage (and it needs to be sturdy) and wheel brakes. A hook can be lowered underneath the rear part of the fuselage to engage the arresters wires. Of course, it was stripped of all superfluous fittings, and flew light. With a powerful Bristol engine it did not need anything like the full length of the deck to take off; in fact, it leapt into the air after a run of about 20 yards.

As soon as he was clear of the bows the pilot lowered his hook, climbed slightly and circled round to behind the stern, and then approached the deck. A red and white flag was flown from the side to give him leave to land on. An instructor on the port side signalled with colored disks to keep the pilot at the right height.

Meantime, four arresters wires had been raised above the deck by means of hinged standards. These wires are connected at each end to powerful springs. The pilot would fly over the stern and stall his Swordfish from a low height. In most cases the hook under the tail caught the first wire, but if it missed that there were three more.

The wire gave for a few yards, and then pulled up the machine dead. At once the deck party of sailors rushed from the sides and seized the wings and tailplane. In fact, all the pilot's troubles were over once his hook had engaged a wire. Just occasionally a pilot delayed his stall too long, and missed all the wires. Then he opened up his engine and flew round again. That day was a record for Courageous, for 212 landings were made.

All the time the destroyer followed close behind the carrier with a manned boat hanging from her davits in case of a crash into the water. Such crashes are fortunately rare, and some experienced pilots hold that even the safety nets on each side of the flying deck are superfluous. Manchester Guardian.

An Interesting Town

Clovelly On English Coast Consists Of Only One Street

Clovelly is a street on the English coast of North Devonshire, straggling from top to bottom of a 400-foot cliff. The town consists literally of one street.

Clovelly is one of the places which have almost robbed the word quaint of its meaning through overuse, writes a correspondent to the Los Angeles Times. Yet Clovelly is so different that it merits less well-worn characterizations.

There has never been a wheeled vehicle in Clovelly. The slope is too steep. Provisions and baggage are dragged down from the New Road Gate on small sledges. Patient little donkeys are used by any one who wishes to trust his neck to their plodding footsteps.

No two houses are alike. They are built of stone brought up from the beach hundreds of years ago by the ancestors of the present inhabitants.

A map of the Dominion of Canada shown in the Canadian pavilion at New York extends the full width of the building on the rear wall. It is made of burnished copper.

Intended to attract large fish, a lure has been invented by a Chicago man that represents a fish of fair size swallowing a smaller one.

Tip For Fishermen

Sport Not So Good During Full Moon Period

Here is a new excuse for the trout fishermen that comes back with nothing more than a glum look—just blame it on the moon.

In a survey made by Prof. C. M. Mottley of the Cornell University department of entomology of 27,000 rainbow trout, from 1932 through 1936, fewer fish were caught after the full moon period. The most outstanding decrease occurred during the August full moon periods. The records were from 1,000-acre Canadian lake.

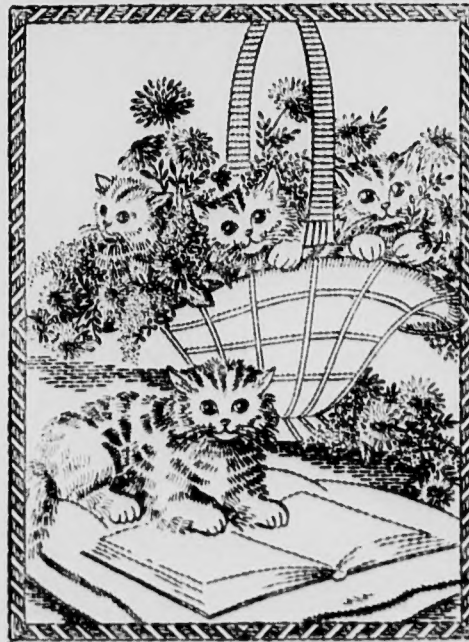

The average catch for August in the five years was six fish a boat (two fishermen) daily. During the August full moon period the catch dropped to four fish daily.

A Vegetarian Car

A Japanese inventor, Akishige Matsumoto, claims to have invented a "vegetarian" automobile which runs on "botanic fuel". Matsumoto, who has been inventing things for 10 years without any outstanding success, said his car "grazes on fruits and vegetables and digests chips of wood" and could cross open country "faster than a donkey."

Mice age so rapidly that a two-year-old mouse is comparable to a man of 70.

Cat and Kittens "Pose" for You

Household Arts by Alice Brooks

Use Vivid Wool or Silk on Unframed Hanging

PATTERN 6346

These kittens want to be embroidered on a gay panel. See what easy stitches they're to be done in! Pattern 6346 contains a transfer pattern of a panel 15 x 20 inches, color chart and key; materials needed; illustrations of stitches.

To obtain this pattern send 20 cents in coin (stamps cannot be accepted) to Household Arts Department, Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Bursts Of Song

Spontaneous Singing Creates A Friendly Attitude Around The Home

Take it from Dr. Miles Dressell of the Music Department of Teachers' College, Columbia University, spontaneous bursts of song around the house from husbands or wives for that matter are a bit of all right.

"Even if you don't have a good voice, singing will provide great individual satisfaction for you," Dr. Dressell said recently. "It gives a great emotional outlet, which in turn leads to increased kindness toward a wife or husband and other members of the family." It must be spontaneous, he warned. If you force yourself to sing, or force someone else to try it, singing loses its charm.

A Clever Crow

Jacky, a talking crow, is owned by Mrs. C. H. Fulbridge of Burridge, England, who taught him to shake hands, retrieve a ball of paper like a dog, open a can of crackers and extract one for his visitor, and pull the clothespins from the line on wash-days.

In Canada's Wood Buffalo Park there are 1,500 of the wood buffaloes, the last of their race.

The World of Wheat

By H. G. L. STRANGE

Director "Crop Testing Plan"

The time for summerfallowing, the most essential operation of Western agriculture, is with us again.

Summerfallowing is an ancient practice. In most countries it is practiced only to destroy weeds, for weeds undoubtedly are most effective means of depriving the soil of precious moisture, and so of causing a heavy loss in crop yield. In Western Canada, however, summerfallowing is usually done for an even more important reason, which is to conserve an extra year's supply of moisture, and so to gain a better assurance of a crop the following year.

Records reveal that the best rains in our prairie provinces fall as a rule early in June. The earlier therefore, that summerfallowing can be done, obviously the more moisture will be conserved, and also of course early cultivations means that less weeds will grow.

Plowing, unfortunately, while it kills weeds is a greater dissipator of moisture. Wherever it is possible, therefore, surface cultivation only of the summerfallow, either with the one way disc, or with duck foot cultivator, should be done, for this method will conserve more moisture than plowing. If, however, a field is infested with well rooted perennials, then the plow may be used, but in general plowing should be avoided if at all possible.

Following factors have tended to raise price: Greece purchases Argentine wheat -- Decrease in 1939 Italian spring wheat acreage -- Expect reduced wheat acreage in Argentina -- German wheat condition reported to be irregular -- Storms damage Italian vineyards and crops -- New Canadian Gold Clause Act.

Following factors have tended to lower price: Floating stocks of wheat and flour enlarging rapidly -- Stocks of wheat and rye in Germany reported to be double that of last year's -- Good general rains relieve dryness in Argentina -- Threshing begins in U.S.A. -- 1939 Algerian wheat and barley estimates larger than 1938 -- Decrease in Oriental wheat purchases -- Condition Canadian wheat crop approximately normal

Searle Precipitation Report

The rains which have fallen from April 1st to May 28th, inclusive combined with the precipitation which occurred during the months of August, September and October last, and all weighted for wheat acreage, indicates that the moisture condition for the three prairie provinces, as a unit, is now 96 per cent of the longtime average of normal, as compared with 95 per cent a week ago and 96 per cent at this time last year.

The similar total moisture condition for Alberta is now 92 per cent of normal, as compared with 90 per cent last week, and 100 per cent at this time a year ago.

For Saskatchewan the similar condition is now 106 per cent as compared with 105 per cent last week and 95 per cent at this time a year ago.

Agricultural Report.

Compiled by Dept. of Agriculture, Edmonton, Alberta, for Period Ending May 29.

Crop conditions in Alberta have improved remarkably during the past two weeks. With a keynote of optimism all correspondents report conditions very much better, not only with respect to moisture but in regard to other factors as well. High winds which swept the crops and caused widespread soil drifting during the early part of May were followed by a period of general rain and showery weather that commenced May 18. This precipitation brought relief to crops suffering from drought, winds and drifting soil, and in some areas the rain arrived just in time to relieve a critical situation, while the entire province benefited to a great extent. Unfortunately, these rains were limited in the Lloydminster and Rockyford districts, and while conditions are not serious in these areas, general rains would be most welcome.

Damage to crops from wind has not been extensive or of a permanent character, mainly because of the recent rains. While some crop was severely injured, actual acreage to be reseeded is small. Most crops have progressed to such an extent that further wind damage is unlikely.

It is estimated that the acreage sown to wheat is approximately 5 per cent higher than that sown last year. Some districts report a decrease, but for the province as a whole, a larger acreage of wheat appears to be in the ground. Oat seedings are somewhat lower, being estimated at about 98 per cent of last year's crop, while barley acreage is expected to show an increase of 1 to 2 per cent over 1938.

Virtually all wheat is now sown. Timely rains revived the wind-damaged fields and re-seeding is therefore limited to isolated cases. Most coarse grains are seeded, although in some districts sowing of coarse grains was delayed awaiting moisture. Growth is satisfactory, some grain being 6 inches in height, and stooling is well developed. The dry spring period has established a strong root system that will make use of subsequent rainfall more effectively. It is unlikely that further damage will occur from wind, as crops are now high enough to protect the surface soil.

Insect damage is limited. Grasshoppers have been active but no serious losses have been reported. Distribution of poison-bait is being carried on from 53 points. Cutworms that were causing alarm in the Peace River area and in the Medicine Hat and Youngstown districts, have been checked by the rains.

Improved pastures, due to the rains throughout the province, have relieved livestock men who were becoming alarmed concerning feed supplies. Stock is now in good condition, even in the Peace River Block where feed was scarce last winter. Prices have become stronger after the drop which occurred when the second quarterly quota to the U.S. market was filled. The general situation in the cattle industry is good and prospects are promising. Light and medium cattle are particularly in good demand.

Excellent to good pastures now obtain in dairying districts and improvement in the condition of dairy cattle is taking place. During the week ending May 20th, deliveries of butterfat fell off because of bad roads. For that week deliveries were 5.2 per cent below the same week in 1938. Prices continue weak, causing some discouragement to producers.

Evangelical Church Notes

The pastor will speak next Sunday morning from the "Belief in the Deity of Christ." In the evening from the theme "Rules for the race of life." Come and worship with us.

Rugby Notes

A Bazaar and Tea, etc. will be held in the Rugby Hall on the afternoon of Thursday, June 22nd, under auspices of the W.I.

With an attendance of 23 members and several visitors, the W.I. meeting was held at the home of Mrs. George Youngs. We were delighted to have a visit from our Constituency Convener, Mrs. Eckel, accompanied by Mrs. B. Woods. All arrangements were made for the bazaar and we are hoping the weatherman will be good to us that day. Mrs. Fairant was chosen delegate to the Constituency Conference at Cremona Hall on June 28th. The July meeting of the W.I. will be held at the home of Mrs. W. Shannon.

A program and lantern lecture on "Nigeria" will be held in the Rugby Hall on Friday evening, June 16th, at 8 o'clock, by Mrs. F. Finlay. There will be a silver collection, which will be devoted toward the musical festival expenses.

Westcott Notes.

Westcott W. I. held their last meeting at the home of Mrs. Steckey. The topic for the afternoon was "Canadianization." Arrangements were made for a demonstration on party planning, to be held at the home of Mrs. Shoultice on the afternoon of June 21. Mrs. Eckel was present and gave much information on the Constituency conference which will be held at Cremona on June 28th, beginning at 11 a.m. Mrs. Ray was appointed delegate to the convention. Next meeting will be held at the home of Mrs. James Hughes on July 6th.

Burnside Notes

Mrs. E. B. Anderson, of Calgary, is spending a month at her home here.

Mr. and Mrs. Otto Bittner are receiving congratulations on the birth of a son on Monday, June 5th.

The annual Lone Pine picnic will be held on Friday, June 30. Rocky Mountain Rangers will furnish the music at the dance which will be held in the evening.

Mrs. Alfie Thompson spent a week visiting Mrs. Otto Krebs west of Didsbury.

Didsbury W.I. Constituency conference will be held in the Cremona Hall on Wednesday, June 28th, starting at 11 a.m.

Mr. Ralph Long has been visiting for a week with Mr. Fred Thompson.

Lone Pine W.I. meeting which was to be held this Thursday has been postponed to June 15th. The meeting will be held at the home of Mr. Wm. McCulloch.

Carstairs E. Community

Scholars and teachers of Hawkeye Greenacres schools spent last week end at Buff on an educational and holiday trip.

Harry Jochem, Gordon and John Spooner left last Monday on a business trip.

Don't forget their will be a dance in the hall on Friday, June 16.

The rain on Sunday and Monday were very welcome and crops are looking fine. Rain soaked through to the sub-moisture.

Mr. and Mrs. Alex Schmick went to Edmonton to see "Their Majesties" last Friday.

M. Weber, of Didsbury, and H. Hammel, of Carstairs, gave a talk on "Social Credit" at the Siebertville school last week. The group was re-organized with the same officers.

Opera House Has "Valley of the Giants"

Wayne Morris and Claire Trevor head the cast of "Valley of the Giants," Technicolor picture based by Warner Bros. on the famous Peter B. Kyne novel of the same name, which comes to the Opera House this Friday and Saturday.

It is a story of the successful fight waged to prevent utter despoliation of California's famous redwood forests by ruthless eastern lumber interests around the turn of the century.

The picture has two of the most hair raising sequences ever filmed. One depicts the rescue of the heroine from a runaway freight caboose just a moment before it reaches a trestle, which, with supports deliberately cut away by the villain's henchmen, collapses under the weight of four lumber-laden flat cars. The other shows a terrific battle between villain and hero atop a dam and the dynamiting of the dam.

NOTICE TO CREDITORS AND CLAIMANTS

In the Matter of the Estate of HANS HANSON, late of Bergen, in the Province of Alberta, Farmer, deceased.

Notice is hereby given that all persons having claims against the estate of the above-named HANS HANSON, who died on the 12th day of December, A.D. 1935, are required to file with the undersigned Solicitor for Trygve Halvorsen, Executor of the Will of the said deceased Hans Hanson, by the 10th day of July, A.D. 1938, a full statement, duly verified, of their claims and of any securities held by them, and that after that date the said Executor will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims which have been so filed, or which have been brought to his knowledge.

Dated this 5th day of June, A.D. 1938.

Directors of Canadian Pacific Railway Meet King and Queen

Their Majesties King George VI and Queen Elizabeth, seen above taking the salute just before leaving Montreal, met and shook hands with several directors of the Canadian Pacific Railway, who are also

seen in this picture. Standing behind Their Majesties are, left to right, Sir Edward Beatty, G.B.E., K.C., L.L.D., chairman and president, Canadian Pacific Railway. Other directors presented were Ross McAllister and M. W. Wilson.

King and Queen, and Sir Herbert Holt, Sir Charles Gordon, G.B.E., D. C. Coleman, vice-president, and Brig.-Gen. F. S. Meighen, C.M.G. Other directors presented were Ross McAllister and M. W. Wilson.

This
**is Life
Insurance**

IN THOUSANDS OF Canadian homes, life insurance money pays the bills—helps to support widows and children—and provides for old age.

Life insurance dollars buy the food for three square meals a day. They buy clothing and other necessities of life. They pay the rent and fuel bills to ensure warm, comfortable homes. They give children an education and a mother's care.

Each year, life insurance policy-owners and their beneficiaries in Canada receive 150 million dollars—five hundred thousand dollars every working day—twenty thousand dollars every hour.

And it is significant that more than 75% of all life insurance payments are made to living policyholders.

YOUR DAILY LIFE NEED NEVER BE DULL

Philosophy Teaches Art Of Living

"Is this all there is to life just one dull task after another?" How many times have you asked yourself this question?

The greatest philosophers answer. They have discovered that behind the petty round of daily duties lies the secret of a fuller, richer life.

"Think not so much of what you lack as of what you already have," said Marcus Aurelius, the great Roman philosopher—and that gives you the key.

What pleasure you can extract from everyday experiences, how you can turn a humdrum life into a glowing, delightful one is told by Lin Yutang, a witty Chinese of our own day. "There is an 'art,' he says, in daily living—and you will find he is right.

Other philosophers too have a message for you. Ralph Waldo Emerson, the beloved American philosopher, showed that even grief can be an enriching experience.

No matter what your life may be, the truths of philosophy are an ever-present guide and comfort. Our 32-page booklet gives the essence of the wisdom of Plato, Aristotle, Epicurus, other great thinkers—ancient and modern. Read and follow their inspiring advice.

Send 15c in coins for your copy of "Philosophy: A Guide to Happier Living" to Service Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

The following booklets are also available at 15c in coins each:
171—"How to Plant and Care for Your Garden"
146—"Home Course in New Ballroom Dances"
126—"Developing Your Personality"

The Philistine of the Bible may have come to Palestine from Crete.

Hidden Document

Paper Establishing British Rule In New York Is Found

Hidden for 255 years, the document establishing British rule over New York has been found and brought to America. The letters patent, signed by King Charles I. in 1647, authorizing Edmund Andros to take possession of the colony, then ruled by the Dutch and called New Netherland, was discovered in possession of the Andros family in England. Acquired through a gift by William Evarts Benjamin, the document has been placed on exhibition by the New York Historical Society.

NEW
SOFTER-TYPE SLENDERIZER
By Anne Adams

Here's a new larger-size frock that boasts the latest kind of feminine softness, and—very strikingly—makes its wearer look pounds lighter and inches taller! As you'll guess after one look, Pattern 4092 is an Anne Adams creation. And you can trust Anne Adams to simplify every dressmaking detail! The pointed yokes serve a double purpose. They hold in the centered bodice fullness, and they direct attention to the prettiness of the neckline. You'll like the high-set tucks over the diaphragm. They have a smoothing effect where it's needed most, and they cleverly carry the slenderizing lines of the three skirt panels up into the bodice. There are two summery sleeves, one fitted, one flared.

Pattern 4092 is available in women's sizes 36, 38, 40, 42, 44, 46 and 48. Size 36 takes 3½ yards 39 inch fabric.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly: Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Radio Talk

Industrial Development Board Of Manitoba Is Reaching Out (By G. E. Miles)

When we as everyday citizens hear or read of an organization such as the Industrial Development Board, its very name meets with our approval and we automatically wish it well and give it our endorsement.

But as everyday citizens of Manitoba don't you think we should know more about it, how it functions, why it is necessary, and what does it mean to each one of us?

Historical facts and statistics, unless you want them, can be tedious, and if these few words awaken your interest we can go into them later, therefore in these few moments we will treat this subject as if you are hearing of the Industrial Development Board for the first time and we will confine ourselves to one phase of it in which I am keenly interested, namely "New Industries".

You all know Emerson's adage of "He who builds a better mousetrap, etc.—and the world will beat a path to his door."—there is of course a grain of truth in this but unless that manufacturer of mousetraps brings the advantages of his mousetraps to the people who are troubled by the mice I know that his competitor who makes a second grade of mousetrap, but really sells it, will have a much better turnover of mousetraps.

Manitoba is just in that position; instead of mousetraps we have the better manufacturing locations to sell and to sell Manitoba to the prospective manufacturer is the purpose of the New Industries Committee of the Manitoba Industrial Development Board, and just in passing please note that I said Manitoba, not Winnipeg, nor Greater Winnipeg, nor St. Boniface, but Manitoba. We are just as interested in securing a new industry for Virden or Whitemouth as we are for Greater Winnipeg; naturally our headquarters are here in Winnipeg and a number of our Board are Greater Winnipeg citizens, and also naturally Winnipeg is an ideal manufacturing centre and just as naturally will get the most of the new industries, but we want the help of you who live in Emerson or Gimli just in the same degree we want the help of all those in Greater Winnipeg.

New who comprise this Board and why do we say we want the help of all Manitobans? It is self-evident that it is the affair of all of us to do what we can to make our province an all around prosperous unit and with this purpose in mind a number of ordinary citizens give a certain amount of time and energy and try to explore the possibilities of establishing New Industries and helping enlarge the markets of established industries, and remember we are not experts, just everyday citizens like you and me.

It is true we have a full time secretary who can claim a spot in the expert class, but this is more than a man job, it is your privilege and one man job, it is your privilege and united efforts tell the prospective manufacturer of the advantages he can receive by starting his new industry in Manitoba, and to do that we must all do a little digging and delving to know our advantages so that we can help sell them. We should also know what we do manufacture now so that we can always help ourselves by giving our "Made in Manitoba" products our preference and of course in searching for new industries we don't want too many of the same line of articles.

As there are to be no statistics or figures in these few words I must not recite all these advantages, but to start your train of thought let me suggest these few:

Unlimited electric power at very low cost.

A market remote from industrial areas.

Plenty of high grade labor.

An imposing list of natural resources.

A loyal people who will buy a made in Manitoba product in preference to all others.

Might I digress a moment and emphasize that last point. It surely requires no urging, but it is one point that does help us each one and it is a help that each one of us can give, without a cent of cost, if we, a half million Manitobans, ask our suppliers for preferably made in Manitoba goods, the establishing of new industries will follow as surely as the night the day.

I wish a large number of you would call in or write our secretary for a very interesting booklet on just what is made in Manitoba—I am not sure about mousetraps but I do know we make venetian blinds, mechanical race-horses, automobiles, windmills, bathing suits and nearly all the other articles you and I can think of.

There is one man in this province I would like to have a talk with, and he is a fine citizen, he is quite sympathetic to and probably belongs to his local Board of Trade, but somehow or other he does not do much about this business of new industries, and it is a job his local board and he himself could really work at, because with his and his fellow townsmen's knowledge and help they could probably expand their local blacksmith's or machine shop business to add quite a few small lines and the chances are a small feed mill, etc., would do really well in his locality, and he might know of some article that is now imported that

Save The Wild Flowers

Ultimate Disappearance Can Only Be Avoided By Exercising Care

Canada's diminishing succession of lovely wild flowers from spring to fall has now reached the point that their ultimate disappearance can be avoided only by the care and consideration of the people. Throughout the years, the greatest destruction of wild flowers has been the clearing of the forests and land for farms and habitations, assisted by forest fires and the grazing of animals. Still later, the want of thought on the part of persons, particularly in the vicinity of the larger centres of population, has hastened the possibility of wild flowers sharing the fate of the buffalo, the musk ox, the great auk, the carrier pigeon and other wild life, for already some of the finest specimens in the woods have disappeared. Hence, the appeal of horticultural societies throughout Canada for the preservation of wild flowers.

The preservation of wild flowers does not mean that no one is allowed to pick a bloom, but it does demand a little thought from the picker. For example, some wild flowers should not be picked at all. Plants like the white trillium, the floral emblem of Ontario, are best left alone in all the glory of their original setting, because these flowers cannot be picked without removing all the foliage on which depends the maturing of the bulbous root for the following season's crop of flowers. Other species of wild flowers, such as violets, hepaticas and the like whose flower stems rise directly from the roots, may be picked at will, provided the body of the plant is left undisturbed.

Tearing up a plant by the roots to gain a bloom is wanton destruction and means only one thing—the passing of beautiful flowers from the Canadian landscape. It is against this reckless plucking of wild flowers that the horticultural societies make their appeal.

somewhere in Manitoba could be made to real advantage.

Then again the Board here often learn of some good chap with knowledge and ability in his line ready to start up a new industry but requires some financial help. But don't send in any money to be put in a new industry but come in and investigate and if your judgment is good you may turn out as fortunate as those early investors in Coca Cola did or that Mayor of Detroit who put in a small amount with an inventor of automobiles.

I am afraid that this is rambling kind of talk but it was not supposed to be informative, the idea was to get you to think, to talk, to find out all about the Industrial Development Board and then to fit yourself into the picture so as to make this Province more industrially minded, to make each one of us a little more prosperous, to help provide real opportunities for our Manitoba boys and girls and to get you to find out that in parallel with Emerson's better mousetrap, we have this perfect thing to sell, and I think you will agree with me that Emerson was wrong, that not only do you have to have a better product than your neighbor but you have to sell it, and so let us all know this opportunity that we have to sell and let us all do our part, let us all become active participating members of the New Industries Committee of the Industrial Development Board of Manitoba.

Restoration In Canada

Must Come By A Renewed Confidence On The Part Of Private Enterprise

Restoration in Canada of "that progress for which we are endowed" must come by a renewed confidence and vigor on the part of private enterprise, Sir Edward Beatty, chairman and president of Canadian Pacific Railway, said in an address at Montreal.

Speaking at the annual meeting of the Advertising and Sales Executives Club of Montreal, the railway head declared that the "inspiration for that progress, so far as we may contribute to it, must come from a genuine confidence on our part in the wisdom and vision of the policies of government."

Sir Edward said he was "far from content with what the railways of Canada have done to meet their opportunities and their own problems" and attributed this "to an unsound arrangement, under which we have an absurd competition between two great railway systems—one publicly and the other privately owned."

Health LEAGUE of CANADA

LEAGUE of CANADA

presents TOPICS of VITAL INTEREST

by DR. J. W. S. McCULLOUGH

NONSENSE ABOUT PROTEINS AND STARCHES

"You must not eat proteins and starches at the same meal," says the faddist. If this theory were carried out our meals would be inadequate and we would suffer from malnutrition in the midst of plenty. Yet this fad is proclaimed far and wide by quacks, faddists and the advertisers of so-called special cures.

Nature has combined proteins and starches in many foods used by people from day to day. Green peas contain about seven per cent. of protein and, on the average about the same of starch. Who refuses to eat green peas on this account? Potatoes contain about 1.8 per cent. of protein and 14 per cent. carbohydrate and the human system still converts 58 per cent. of protein into carbohydrate.

One of the most noted of the faddists who warn us against the use of protein and starch advocates the use of whole wheat flour and thus swallows himself. Whole wheat flour is chiefly starch but it also contains about 13.8 per cent. of protein, while wheat germ, similarly advocated, contains about equal quantities of protein and starch.

It is remarkable how the advocates of nonsense continue to promote faddism and with much success even among the more enlightened members of the community. The gullible portion of the public are much readier to accept the advice of the charlatan than they are to believe that of medically-trained opinion. In consequence they and their families are the sufferers.

Mother Nature knows more about food combinations than any faddists. There is not the slightest ground for believing that a food combination of proteins, starches and carbohydrates in proper proportions, will do any injury to the user. As a matter of fact the best diets are combinations of these food elements and if we wish to gain the highest benefits from our foods, the diet must be balanced in-so-far as these elements are concerned. The public should turn a deaf ear to the oft-repeated nonsense about proteins and starches.

Street Mendicants

Beggars In London Cause Annoyance To Merchants

There has recently been a noticeable increase in the numbers of street musicians, match sellers and beggars in Bond street. These characters are in many respects a public nuisance. Their activities have not only left visitors from overseas with an unfavorable impression of the street, but have also caused a loss of trade to shopkeepers.

A wealthy customer of some of the best known shops in Bond street and its tributaries recently made it known that she had ceased to visit these shops because she was so frequently pestered by street musicians and beggars. It was estimated that she spent 1750 a year in the shops.

Some success in dealing with street musicians and beggars has been achieved in Grosvenor street by the combined efforts of shopkeepers. There it was decided some months ago that any street musicians or beggars stopping outside any premises should be told immediately to move on. This action, taken by all the traders in Grosvenor street, has made it a most unpopular street with wandering musicians and beggars.—London Times.

CHAPTER X.—Continued

Sarah Lynn felt a little shiver of appreciation. She had known it, the swift white peace, the stinging exultation. Life would never press too close on her, on Gunnar; they wouldn't let it! They were not earth-bound; they had dominion.

Jordan played on and on, quietly now, with a conviction of serenity and permanence, and the crimson of the hearth died down to a hot, gray ash. It seemed to Sarah Lynn that her heart must literally burst with its weight of surging happiness.

Gunnar let Sarah Lynn take the Hermod up alone one day and stood waiting proudly while she brought it smoothly and beautifully to earth. It was her accolade; sign and symbol of his utter trust.

They walked on the shore beside the blue, bright water and he took her in his arms. "So," he said, lifting his head after a long kiss, "you are fearless, also wise. You fly safely and skillfully my Hermod. I love you."

Sarah Lynn pulled herself out of his embrace to look up at him. "Gunnar, do you love me?"

"I have not said."

"I know. But I mean—is it only

MEN LOVE GIRLS WITH PEP

If you are peppy and full of fun, men will invite you to dances and parties.

BUT if you are cross, listless and tired, men won't be interested. Men don't like "quiet" girls. When they go to parties they want girls along who are full of pep.

So in case you need a good general system tonic, remember for 3 generations one woman has told another how to go "smiling thru" with Lydia E. Pinkham's Vegetable Compound. It helps build up more physical resistance and thus aids in giving you more pep and lessens distress from female functional disorders.

You'll find Pinkham's Compound WELL WORTH TRYING!

because I've learned to fly properly? Because I'm not afraid? Because I do the kind of things you like? Or is it—myself?"

He laughed aloud. "This is a folly. I love you because you are you—without fear, and wise, a good flier. It is answered."

"No, but"—there was a shadow in the eyes of the queer, dark Dana girl. "Don't you think we ought to care for people themselves, not for what they do? Not even for what they are? I think."

"It needs no thinking," he said. "But—Gunnar, suppose—suppose I stopped flying?"

"Suppose you stopped living? Enough of folly! We finish!" He kissed her again.

"Enough of folly. We finish!"

Lynn Dana wrote to his travelling cousin:

"I wish you were here to see them now, Sally Ann. By and by, I suppose, an inexorable calendar will catch them and clip their wings, but now they are soaring!"

"Their visit at Jordan's Tahoe lodge seemed to set them free. They are armored against everything now, even poor Cousin Adelaide. They say little of plans but I gather they are to marry in a fortnight and go at once to Norway where he has excellent prospects."

"I think—at least, I suspect—that they will fly the Atlantic in the Hermod, in complete secrecy. I doubt if they will even tell me."

"Of course I shall miss them blankly, bleakly; it doesn't need your nimble and trained imagination to understand how much of flavor and fragrance will go out of things, but I shall manage to rejoice for our dark duckling hatched into an eagle's mate."

"There's something lyric, something mythical and symbolic about their romance; partly, I suppose, because of its evanescent quality, because they are looking constantly into the bright face of danger. It's hard to imagine them middle-aged and portly; I can't see beyond youth for them."

"Doubtless this is all because I'm a little low in my mind on another count. Granny is going down hill very perceptibly, and it gets me. Everything dimming eyes, ears; a slowing down all around. She senses it of course and she loathes it."

"So, then! Sorry you're missing the skylarks but glad you are being spared the matriarch's defeat."

Her great-grandmother's condition was evident even to Sarah Lynn's high-keyed preoccupation, and she ached with pity and protest. The old woman sent for her and went at once to the point.

"Sairy Lynn, I guess I don't need to tell you I'm getting older every minute."

"I know, Great-granny." She took a small, lean claw in her warm grasp. "And I wish I could give you twenty years."

"The last ones? Think now, looking so far ahead, that you won't want 'em? Well, you will, let me tell you; you'll want 'em the worst way. And you'll know you can't have 'em. Well, I'm obliged to you for the wish."

"I'm sorry," Sarah Lynn said. "Oh, Great-granny, I wish there was something I could do!"

"Well, there is," the nonagenarian said briskly. "That's what I'm getting at. That's why I sent for you."

What a Clever Little Table Stove!

At your dealer's or write for FREE literature. **COLEMAN LAMP & STOVE CO., LTD.** Dept. WN 581 Toronto, Ontario

I know you're getting married and putting out, quick's ever you can, Sairy Lynn, and that's right. I want you should. But there's a favor you could do me first."

"Anything?" she said gladly. "Anything I can—"

"I should admire to have a ride in your flying-machine, Sairy Lynn."

"Of course, Great-granny! I'd adore it."

"Well, there's plenty that won't," she said grimly. "When the folks hear of it there'll be the devil to pay and no pitch hot, but I don't care. I've got a hankering to see what it's like. I want to ride up in the sky and look down at birds flapping their wings that I always envied, and I want to look down at Danavale and all the foolish houses the folks built and the road your Gre-gramp and I come over in the covered wagons, dirty and dog-tired and snailing along with the half-dead critters hauling us. I want to do that once before I die."

"And you shall, Great-granny, dear," she told her. "I promise—cross my heart!" Gunnar would loan her the Hermod for this ritual.

CHAPTER XI.

It was a pretty day. Gunnar approved the weather, and he warmly approved the project. It was exactly what he wished he might have done for Grandmother Gudrun.

Lynn Dana was deeply pleased. "She gave you your wings; right to share them with her," he nodded.

The colony came, the protestants, at least, anxious, indignant, annoyed, and the harried Emma Waters kept saying, "Now, Mis' Dana, where's your handkerchief? Mis' Dana, you went and took your knitted jacket off!"

Wrapped like a little old royal mummy, she was finally lifted into the cabin of the Hermod in Gunnar's long arms.

"I'm obliged to you, young feller," she thanked him. "And I'm real pleased about you and my child. I've set store by Sairy Lynn from the first minute I laid eyes on her in the cradle. I believe you're going to make her a good husband."

"I will make her a good husband," he told her gravely, fastening the seat belt about her, getting out again, passing through the group of disapproving faces.

The matriarch rapped on the window with her lean knuckles and waved at her elderly daughters, her middle-aged granddaughters, and gave her shrill, cackling laugh.

"Now, go on home and don't fret," she admonished them, "you poor old things!"

Then Sarah Lynn Dana took her ship away from the pleasant landscape into the calm skies, carrying the 97-year-old pioneer who had crossed the plains in a covered wagon to found the dynasty of Danavale.

Sarah Lynn looked back at her often and every time she smiled all over her small parchment face and waved a claw.

"I'm having the best time I ever had in all my born days, Sairy Lynn," she chirped, unaware that her wavering treble did not carry over the sound of the motor. "Beats everything. Even the first day in the wagon-train, and the day we knew we was in California. My land, what would your Gre-gramp think of this?" She gave a little crow of triumph. "Well, poor Hank! When I think how he come across the continent, most of the way a-foot, 'cause we lost so many critters and we had to make the loads light, and he was young and stout. I'd admire to have him here, to-day, looking down like I am. Well, forevermore! If that's all Mt. Hamilton amounts to, and the way I've been looking up

at it for eighty-odd years. My, but the air's nice up here, Sairy Lynn! Awful light and thin . . . Makes a body drowsy . . ."

The flier looked back and saw her nodding. It was too bad to let her lose an instant of this thrill. She executed a mild side slip and the old woman sat up with a jerk and grinned at her.

"Hey, Sairy Lynn! What you up to? Trying to spill me out?" She looked down with renewed animation but very soon she was sleepy again.

Sarah Lynn waited until she had her full attention and then she inquired, both by words which she knew could not be heard and by unmistakable gestures whether she was ready to descend.

She shook her head violently. "No! No! I don't want to go down! I don't want to have it over. I want to keep on going up and up and up!"

"All right," her great-granddaughter said, and set the Hermod to climbing. After a while they encountered a soft sea of pink clouds and rose over it. It was an exquisitely lovely thing to see, but the passenger's sharp chin was resting on her breast and she appeared to be sleeping soundly. Sarah Lynn thought it a pity; there would be time enough and to spare for napping down in the little old Dana house when she and Gunnar were far across the sea, so she did another sharp slip to rouse, but the small figure in the thick wrappings did not stir.

Sarah Lynn looked at her for a long time. Then she pulled off a glove and tossed it back. It struck the shawled shoulder smartly, but the head did not lift. Then the pilot headed for the coast, over the Santa Cruz mountains to the Pacific and flew along the shore. After a while she shook the tears out of her eyes and looked into the sunset; she thought she had never seen one so lavish, so jubilant.

She rose and climbed and set out for home and when she circled the field at San Jose she could see the diminished descendants of Sarah Ann Kittredge Dana, pioneer, in a anxious huddle, gazing up. When she set her ship down gently her head was high.

Gunnar opened the door, looking closely at her, and the rest came

hurrying up. She got out slowly, without speaking, and they stared at her. She wasn't crying, but they could see traces of tears on her face.

"Mother!" some of the elderly daughters called, and "Oh, Grandma!" a middle-aged granddaughter cried out shrilly.

Then there was a wild clamor of talking and weeping, of questions and reproaches. Sarah Lynn stood quietly in the midst of them, trying to keep remembering how the sunset had looked. "Great-granny," she steadied her voice, "Great-granny—didn't come down."

LOCAL & GENERAL

Miss Margaret Ranton, Lacombe, is spending her vacation with her parents, Mr. and Mrs. E. G. Ranton.

Miss Frances Chamberlain, of Calgary, visited her parental home here last weekend.

The "Y" social planned for June 6th has been postponed until Tuesday evening, June 13.

Mr. and Mrs. H. D. Booker were in Edmonton last weekend and took in the Royal visit.

The Olds Sports which were to have been held June 7th, were postponed on account of soaked grounds. They will be held June 21st.

Dr. and Mrs. Clarke motored to Edmonton on Friday and visited relatives during the Royal visit week end.

Week-end Special—Regular \$1.95 House Dresses for \$1.79.—The New Shoppe.

Mr. and Mrs. Harder returned last weekend from a trip to Colorado Springs, Colo., where they attended a reunion of the Harder family.

Didsbury Calf Club will hold a regular meeting at Mr. W. Morton's place west of town on Saturday, June 10 at 2 p.m.

Mrs. Austin, Mrs. Wall and Don Lamont were at Sylvan Lake last weekend, redecorating the "Mic Mac" cottage for the season.

Mr. and Mrs. J. W. Wordie and family motored to Edmonton on Friday to attend the Royal Visit to that city.

Messrs. H. Morgan and W. G. Liesemer motored to Edmonton on Monday to attend the funeral of the late Mr. James Eubank.

Misses Orpha Gabel and Edith Webster, of St. Joseph's Hospital, Victoria, B.C., are visiting their respective homes here while on vacation.

Mr. Dennis Jenkins, manager of the Federal elevator at Sunnyslope, had charge of the local Federal elevator last week during the absence of Mr. Al McInnis.

Mr. H. A. Stackhouse, of the Royal Bank, left on Friday for Lacombe, having been transferred. He is being succeeded by Mr. Victor Friesen from Medicine Hat.

Mightier in its thrills than any picture you've ever seen, and glorious in Technicolor, comes "Valley of the Giants" to the movies this week, with Wayne Morris and Claire Trevor.

Mr. and Mrs. Al. McInnis, accompanied by their son Walter, attended the funeral of their sister-in-law, Mrs. John McInnis, which was held at Rosetown, Saskatchewan, last Thursday.

Mr. H. G. McFarquhar, of Black Diamond, arrived here last Thursday and will help his brother, W. A. McFarquhar, in the hardware store. Mr. McFarquhar's family will follow him here the latter part of the month.

Mr. and Mrs. Dilman Hunsperger and daughter Edna, of Preston, Ont., are visiting their cousins Mr. and Mrs. Allen Hunsperger. They will also visit other relatives and friends in the district during their month's vacation.

H. L. Welch reports that his flax crop is coming along fine this year. He has an excellent showing of registered flax grown on breaking. If the crop gets a minimum rain, Harold says that he will be assured of a No. 1 bumper flax harvest.

During the Royal Visit to Banff, Miss Marion McDonald had the honor of waiting on several members of the Royal party who were at the Tea Kettle Inn for afternoon tea. They were the first dresser to the Queen, the two ladies-in-waiting, and friends.

While Mrs. Ada Stevens, Mrs. Frank Stevens and daughter Mona were driving into town recently, their car went over the bank at the Deadrick corner and turned completely over. Fortunately, none of the passengers were seriously hurt, nor was the car badly damaged.

For men's summer underwear and dress shirts—don't forget that T. E. Scott carries an extra good line!

WEDDINGS

FALK-TRAUB

The home of Mr. and Mrs. A. Traub, Didsbury, Alberta, was the scene of a very pretty wedding on June 1st, 1939, when their daughter, Ruby Fern, became the bride of Mr. Willard Falk, of Cremona, Alberta.

The rooms were decorated for the happy occasion in yellow and white, with bouquets of mauve lilacs. At the noon hour Mr. Harley Traub sang "Love is Shining All Around," after which the bridal party, consisting of the groom, supported by Mr. Arnold Sherick; the bridesmaid, Miss Mildred Traub, dressed in peace-blue crepe and carrying pink carnations; and the bride, accompanied by Mr. Ernest Traub, and charmingly dressed in suez color crepe and carrying yellow roses, took their place under a pretty arch to the strains of Mendelssohn's wedding march, played by Mrs. Harley Traub. The ceremony was performed by the father of the bride.

At the close of the ceremony Mr. Harley Traub rendered very beautifully the solo "O Perfect Love."

About forty guests enjoyed a delicious buffet luncheon, after which the happy couple left by motor amid showers of confetti and good wishes for a short honeymoon at Banff, the bride wearing a beige coat with suez color hat and accessories.

Upon their return Mr. and Mrs. Falk will live near Cremona, Alberta.

Neapolis Children Visit Calgary Airport

Between 35 and 40 schoolchildren and adults from Neapolis on Friday paid a visit to the airport in the course of an industrial trip around Calgary.

Howard Chase, Trans-Canada Airlines traffic manager for Calgary, explained that the children saw the T.C.A. planes go overhead every day and were very interested to see one land and take off. The Neapolis children saw the northbound plane arrive from Lethbridge at 10:10 and leave again ten minutes later for Edmonton.

Officials took the party around the airport and explained the operation of the radio, in which the children were particularly interested.

The party took in a number of industrial plants and the visit was both instructive and enjoyable.
